About the Bulletin.....	14
Data Quality Statement: International Merchandise Trade Statistics.....	15

## Highlights

The international merchandise trade balance recorded in the December quarter of 2017 shows a deficit of \$334.2m. The deficit has more than doubled (178%) with a \$212.1m increase over the deficit of \$120.1m recorded in the previous quarter. In terms of the corresponding quarter a year ago, the deficit represented a drastic increase of \$282.3m (544%), over six times the deficit of \$51.8m in 2016.

The year-ended December 2017 recorded a deficit of \$567.3m, the highest recorded since 2010. This is an increase of \$426.31m (302%) or four times the size of the deficit of \$141.0m recorded in the year-ended December 2016.

Merchandise trade movements by major commodity in the fourth quarter of 2017 compared to the corresponding quarter of 2016 recorded the following:

### **Major Exports**

- Round log and sawn timber exports increased by \$108m (16%) to \$788m.
- Total of fresh/frozen and canned fish increased by \$43.5m (48%) to \$133m.
- Total of cocoa, palm oil and other agricultural products decreased by \$47m (-30%) to \$107m. This was mainly driven by low exports of palm oil and cocoa during the quarter.
- Gold has increased by \$224 (6%) to close to \$4m.

### **Major Imports**

- Food imports, which is comprised mostly of rice and canned meat, increased by \$42.8m (20.4%) to \$253m.
- Mineral fuel and lubricant imports decreased by \$62m (-27.9%) to \$160.6m.
- Machinery and transport equipment increased by \$417.2m (143.8%) to \$707.2m driven also by an increase of 38% in vehicle (special purpose) imports.

Merchandise trade balance with major trading partners in the December quarter of 2017 compared to the same quarter in 2016 records the following:

- The trade deficit with Singapore, the main source of fuel imports, decreased by \$49.2m (-24.4%) to \$153m.
- The trade deficit with Australia increased by \$62.4m (31%) to \$264m.
- The trade deficit with Papua New Guinea widened by \$3.7m (21.6%) to \$21m.
- The trade balance with South Korea decreased by \$10m (-188%) to a surplus of \$5m.
- The trade surplus with China, the main destination of exported logs, increased by \$201.8m (44%) to \$660m.
- The trade surplus with Italy, the main destination of fish-loin exports, increased by \$27.5m (42%) to \$93m.

## About the Bulletin

This publication is a statistical report of the country's international merchandise trade statistics released periodically every quarter. The bulletin follows the United Nations definitions and compilation practice of international merchandise trade statistics with closer harmonization with regional compilation standards.

### Concepts and Definitions

#### Imports

Merchandise imports (cif) are goods bought by Solomon Islands residents and institutions from overseas. These goods are imported into Solomon Islands from other countries. The valuation of imports include the cost of insurance and freight (cif).

#### Exports

Merchandise exports (fob) are goods bought by residents and institutions that reside overseas. These goods are exported from the Solomon Islands as the place of origin to another country. The valuation of exports excludes the cost of insurance and freight (cif) and is valued free on board (fob).

#### Merchandise trade

Refers to all exports and imports of goods entering and departing the economic territory of the Solomon Islands that have an impact on the country's national stock of material resources as a result of trade. This excludes trade in service transactions classified as non-merchandise trade. See data quality section for more details.

#### Trade balance

Trade balance is the difference between imports (cif) and exports (fob) or calculated by deducting imports (cif) from exports (fob).

#### Re-Exports

This refers to merchandise exports that were previously imported or in-transit in the Solomon Islands and have an insignificant value or its contents have below half its value.

#### Trade Deficit (-)/Trade Surplus (+)

A trade deficit is when the value of imports is greater than the value of exports. The opposite is referred to as a trade surplus.

#### Country of Origin

The country where the goods originated or was manufactured from.

#### Country of Destination

The country where exported goods reach its final destination.

#### Value

All imports and exports are expressed in monetary value in the Solomon Islands Dollar (\$SBD).

#### Symbols used

Second Quarter, Week beginning October 29

Third Quarter, Week beginning December 24

## Data Quality Statement: International Merchandise Trade Statistics

<b>Data Source:</b>	<p><b>Primary source:</b> Solomon Islands Customs and Excise Division (SICED)</p> <p><b>Secondary source:</b> Commodity Export Marketing Authority (CEMA); Importer and Exporters (selected firms); Central Bank of Solomon Islands (CBSI) Balance of Payments.</p>
<b>Institutional Environment:</b>	<p><b>Data Collector(s):</b> The Solomon Islands National Statistics Office (SINSO) Trade Unit collects imports and exports data captured by the SICED of the Ministry of Finance and Treasury (MOFT) through its data system prior to the third quarter of 2015 and subsequently through the current ASYCUDA system. The SICED data are compiled from customs declarations submitted by residents and institutions, many of which are business companies, who are regarded as importers and exporters. The SINSO also collects information independently on exports and imports from selected companies, the CEMA and CBSI balance of payments data.</p> <p><b>Collection authority:</b> The data is collected under the Statistics Act 1970 (and 2007 Amendments) and a Memorandum of Understanding between the SINSO and the SICED.</p> <p><b>Data Compiler(s):</b> The SINSO is the Official Compiler of the International Merchandise Trade (MIT) Statistics.</p> <p><b>Compilation Methodology:</b> The compilation follows the UN's definitions, coding and classification practice of merchandise trade statistics in line with the UN's Standard International Trade Classification (SITC).</p> <p><b>Standard Classifications:</b> SINSO applies the UN's SITC versions 3 prior to 2012 and subsequently version 4 to date. Other classification references include UN's Broad Economic Categories (BEC) and the Pacific Community's Harmonized Commodity Description and Coding System (2012, 2017). The raw data from SICED is coded and classified following the World Customs Harmonized System (HS) for tariffs and trade statistics and thus the SINSO links the HS formatted data to the SITC/BEC classification but uses the SITC to publish the statistics.</p> <p><b>Additional information:</b> Statistical confidentiality is guaranteed under the Statistics Act 1970 (and 2007 Amendments).</p>
<b>Relevance:</b>	<p><b>Data topic:</b> The main data items captured from the declarations made by importers and exporters include: commodity code and description, quantity, value, country (origin, final destination, and consignment), contract details of individual importer/exporter, domestic destination for imports, place of origin for exports, port of clearance, and mode of transportation.</p> <p><b>Level of geography:</b> The data is available by main ports of Honiara and selected provincial ports.</p> <p><b>Key Data Items:</b> The key data items currently compiled and published include international trade balance, value of trade by year and quarter, value of imports by country of origin, value of exports by final destination and value of imports and exports by commodity group. The unit record data is available at 8-digit level of classification. The published data is presented up to 4-digit aggregation levels with only selected goods presented at 8-digit level.</p> <p><b>Data Limitations:</b> Major limitations include:</p> <ul style="list-style-type: none"> <li>• Data prior to 2015 from SICED was often in unedited format and validated only at the aggregate level. Statistics on the volume of trade cannot be compiled adequately given the poor quality of the volume data.</li> <li>• Data from SICED represents mainly trade through the Honiara port and to a lesser extent data from other outer island ports.</li> </ul>

	<ul style="list-style-type: none"> <li>• Data from 1998-2000 and the first two quarters of 2009 are unavailable or incomplete for the purpose of a time series covering these periods.</li> <li>• Data on illegal trading, which may include significant quantities, is not captured.</li> <li>• A number of other secondary data sources are used to adjust for discrepancies in the data from SICED.</li> <li>• Data from third quarter 2015 and onward are extracted from the newly introduced ASYCUDA system which is now adopted by the SICED.</li> <li>• Data on major commodities such as fish, copra, cocoa, palm oil, rice, fuel and tobacco are sourced from the industries/major firms.</li> </ul>
<b>Timeliness:</b>	<p><b>Additional information:</b> The purpose for collecting the data is to assist decision making and understanding of the economic behavior of merchandise trade in the country. Currently the analysis provided does not cover all components required by the United Nations standard (such as mode of transport etc) but this will be expanded over time.</p> <p><b>Data collected:</b> Data is collected monthly.</p> <p><b>Data available:</b> Data and published results are expected to be available two months after the relevant quarter. However, delays often occur due mainly to delays in receiving information and data quality checks.</p> <p><b>Reference Period:</b> The data is collected over one quarter (3 months) and published on a quarterly frequency.</p> <p><b>Timing of Recording:</b> The timing for exports is recorded on the date when the goods are cleared from SICED. Imports are recorded on the date when the goods are released from SICED.</p> <p><b>Additional information:</b> Revisions are sometimes made to the statistics after its release if incorrect information is received and/or other related data quality checks are applied.</p>
<b>Accuracy:</b>	<p><b>Method of Collection:</b> The SINSO collects data from the SICED directly through a flash drive backup prior to mid-2015, and subsequently through the ASYCUDA data system. In addition, the SINSO requests large firms to provide their records on imports or exports for three months. Importers and exporters provide their import and export data through the customs declarations including through the recent electronic self-assessment document (eSAD) forms when they import and export goods.</p> <p><b>Data Adjustments:</b> Data is checked for quality by SICED, and by the SINSO. Adjustments to data are made where necessary, when dealing with data gaps or reconciling inconsistencies following standard statistical techniques. Duplicate entries are often removed, whilst noting that small discrepancies between totals and sums of commodities in tables are due to rounding.</p> <p><b>Additional information:</b> Following UN recommendations, goods relating to personal effects of travelers, temporary imports and exports, goods in transit, goods on lease for less than a year, and goods consigned to diplomats/diplomatic status are excluded from merchandise trade statistics compilation. Fishing data from the high seas are often unaccounted for in the data collected. Data on trade in service transactions are excluded including goods for repairs in imports. Data on illegal trading of goods, which may include significant quantities is not captured. Processing errors are minimized by using software to detect and remove duplicates. If the SINSO identifies errors in published statistics, SICED are contacted to help resolve the error and a revised figure is published in the next issue of the statistical bulletin.</p>

<b>Coherence:</b>	<p>There is consistent time series data although data from 1998-2000 and the first two quarters of 2009 are unavailable or incomplete and are estimated. Prior to the third quarter of 2015, data was collected from SICED who were using their own processing system until the introduction of the ASYCUDA system.</p> <p><b>Additional information:</b> There is no data available for 1998 to 2000 due to the period of civil unrest in the country ('Tensions').</p>
<b>Interpretability:</b>	<p><b>Other Supporting information:</b> The concepts and definitions stated earlier in the section 'About the Bulletin' should assist readers understand and interpret the statistics. In addition, the UN's international merchandise trade statistics classifications are available to help users better understand and interpret the data. The following standard and related classifications are also available to aid understanding:</p> <p>The Standard International Trade Classification V4:  <a href="https://unstats.un.org/unsd/publication/SeriesM/SeriesM_34rev4E.pdf">https://unstats.un.org/unsd/publication/SeriesM/SeriesM_34rev4E.pdf</a></p> <p>UN's Broad Economic Categories Classification v4:  <a href="http://unstats.un.org/unsd/pubs/gesgrid.asp?id=331">http://unstats.un.org/unsd/pubs/gesgrid.asp?id=331</a></p> <p>The Pacific Community's Tariff Classification (2012, 2017)</p> <p>The percentage (%) change applied from year over previous year, or quarter over previous quarter, refers to the extent to which the value of imports or exports gains or loses value over the given period. It is calculated as the value of the current period less the value of the previous period, divided by the value of the previous period and multiplied by 100 (%). For example, taking the 4<sup>th</sup> quarter (December) 2016 and 2017 export figures ('000), we calculate percentage change (December quarter over same period a year ago) as: <math>(\\$117,3803 - \\$99,9014) / \\$999,014 \times 100 = 7.5\%</math>. This implies that the value of exports has increased by 7.5% (\$174,790) from December 2016 to December 2017 period. One can apply similar calculations depending on the period of choice, for example, year over year etc.</p> <p><b>Additional information:</b> Users are encouraged to firstly read the title of the tables to understand the content of the tabular presentation of the statistics. Table: 1 refer to both imports and exports while Tables: 2 (a, b), 4 and 5 refer to imports, and Tables: 3(a, b), 6 and 7 refers to exports.</p>
<b>Accessibility:</b>	<p>Unpublished data can be requested. Users can request data that has not been published by sending an email or contacting the Government Statistician. There is no charge associated with data requests.</p> <p><b>Contact details:</b> <a href="mailto:STATS-management@mof.gov.sb">STATS-management@mof.gov.sb</a>; <a href="mailto:STATS-economics@mof.gov.sb">STATS-economics@mof.gov.sb</a></p> <p><b>Additional information:</b> The data are available in spreadsheets which can be downloaded from the Solomon Islands' National Statistics Office website: <a href="http://www.statistics.gov.sb">www.statistics.gov.sb</a>. Unit record information is not published to maintain confidentiality.</p>
